Northbridge Analytics — Security & Compliance Whitepaper

Data Encryption

All customer data is encrypted at rest using AES-256 and in transit using TLS 1.3. Encryption keys are rotated every 90 days and managed via a dedicated hardware security module (HSM).

Compliance Certifications

Northbridge Analytics is SOC 2 Type II certified and GDPR compliant. ISO 27001 certification is currently in progress, with completion targeted for the next fiscal year.

Incident Response

The security team maintains a documented incident response plan with a target detection-to-containment time of under 4 hours for critical severity incidents.

Data Retention

Customer data is retained for 24 months after account closure, after which it is permanently and irreversibly deleted, unless a longer retention period is contractually required.
